Bread Without Flour.

The German process of making bread direct from the whole wheat, dispensing entirely with the milling process, has already been described in these columns. This process has been adopted in Italy to some extent, where it was received with so much favor that the bakers were compelled to cut prices to meet the new competition.

It is known as the "anti-spire" method. It is made directly from the wheat, and a great saving in the cost of manufacture is credited to it. After the wheat has been thoroughly sifted and cleaned it is subjected to a bath in tepid water for several hours. When it has thus been soaked it is poured into a machine, which reduces it to a homogenous paste. This machine is composed of a double line of thin spirals working in opposite directions. By these spirals the softened wheat seeds are well kneaded. At the end of the spirals is a double cylinder which receives the paste and makes it still more compact and ready for shaping into loaves and baking.

The quality of the bread made by the new process is variously estimated. Excellent judges and unprejudiced practical bakers admit its excellence, manipulation and treatment in the oven. Italian experts who have investigated the matter express themselves favorably upon its ligestive proprieties and pronounce it most nourishing. In color the "anti-spire" bread is very brown; its odor is agreeable and taste quite palatable. A cardinal virtue claimed for it is that it never gets mouldy and will remain "fresh" for days.

The bakery at Rome charges three cents a pound for "anti-spire" bread, thirty centimes per kilogramme (two pounds)-but when the establishment is opened in the morning at 8 o'clock workingmen may buy it for two centimes per kilogramme cheaper.

Mortgages her Home to Buy Back a Confiscated Mule.

GREENVILLE, S. C., March 3 .- A touching chapter in the history of the dispensary law was enacted here to today. A week or more ago as a dispensary constable was driving along the road between this city and Reedy River factory, he met an old man in a wagon with his two daughters, one a widow with two children. The wagon was searched and about four gallons of whiskey were found. The constable brought the occupants of the wagon to town and a charge of transporting was lodged against the old man, Dan Ballew. It was a cold, windy day and as the old mule pulled the wagon slowly into town the women and children looked half frozen in their thin and scanty garments. The party was moving from Reedy River factory, where some of them had been working in the cotton mill, back to the old home near Glassy mountain in the upper part of the county. They were allowed to take their team, which was by law confiscated to the State, on promising to return it, which they did. The wagon and mule has since been in a stable in this city waiting for the day of sale. Today the wife of old Ballew and her widowed daughters came to town, making the trip f 20 miles, by starting early in the morning. As they sat by the fire in the sheriff's office in their faded cloaks and brown sunbonnets, it was a good subject for a character sketch. By special request of the women, who had come instead of Ballew, who is a partial invalid, Constable LaFar agreed to sell the mule and wagon today so that they might have a chance to bid them in. The women then went out to mortgage their little farm and raise the money to buy back the team.

They told a pitiful story of their condition and the old man's affliction. Constable LaFar expressed to them but at the same time said he would So serious has the bread question have to do his duty in carrying out
